

Landscape Designer - Residential Division

Overview

Our Midwestern roots run deep. Founded in 1974, Lanoha Nurseries is one of the largest family-owned & operated Nurseries, Garden Centers, and Landscape Construction & Design Firms in the Midwest. With over 700 acres in nursery production, our team cultivates, maintains, and installs the largest selection of homegrown trees, shrubs, perennials, and annuals throughout the Metro. Regardless of project scale, our professional Landscape Design and Construction teams have both the ability and passion to turn your ideas into your ideal outdoor space. Lanoha is an industry leader with nearly 50 years serving our community. We are seeking career-minded individuals to join our team.

Lanoha Nurseries is expanding the Landscape Design Team to add an additional Landscape Designer to support the Residential Landscape Design and Construction Division. Landscape Designers assist in all phases of the design & install process. This includes initial meetings with clients, creating landscape designs, estimating, presenting proposals, material acquisition, site layouts, and supervision of our landscape labor force. Your designs will be installed by Nebraska's most talented & dedicated landscape construction crews.
